

HYDROMINING Pitch

Presentation 2025

INTRODUCTION

The Green Crypto Revolution Starts Here

- 🕒 **Imagine a world** where every cryptocurrency mined not only generates profit, but also powers a sustainable future. I'm **Víctor Nieto**, a crypto mining veteran with 9+ years of experience. I present **HydroMining**: the first token-backed project to build **100% hydroelectric mining farms**, merging blockchain with environmental responsibility.

"It's not just a token: it's a movement to transform an industry addicted to fossil fuels."

PROBLEM

The Dirty Secret of Mining

Crypto mining

consumes **~150 TWh of electricity annually** (more than entire countries), with **45%+ of it coming from non-renewable** sources. This creates two problems:

Environmental damage

Massive carbon footprint.

Distrust

90% of tokens fail due to scams or lack of utility

- The market demands **reliable and environmentally friendly projects**, but no one has combined sustainability and profitability. Until now.

Bitcoin mining sustainability

SOLUTION

HydroMining – A Token with a Purpose

HydroMining is a **token on BSC** that funds hydroelectric mining farms. Here's how it works:

Tokenomics:

Distribution:

Deflationary Token

- Each month, **70% of the mining profits** will be used to buy back and burn the tokens.

Maximum transparency

- 0% tokens for the team.**
- Liquidity blocked forever.**
- Contract audited twice** (CertiK + EtherAuthority).

MARKET SIZE

Billion-Dollar Opportunity

\$101
billions.

TAM
Global crypto
market

\$30.000M+
(Growing at 22%
annually)

SAM
Green projects

100M of cost,
50M per year

SOM
HydroMining Goal

10 Farms  **5 Years**  **500 Mining Machines per farm**

WHY NOW?

Perfect Timing

REGULATORY PRESSURE

Governments demand sustainable mining (e.g. MiCA in the EU).

INVESTOR DEMAND

65% of millennials prefer ESG-aligned assets.

CREDIBILITY CRISIS

HydroMining solves scams with transparency.

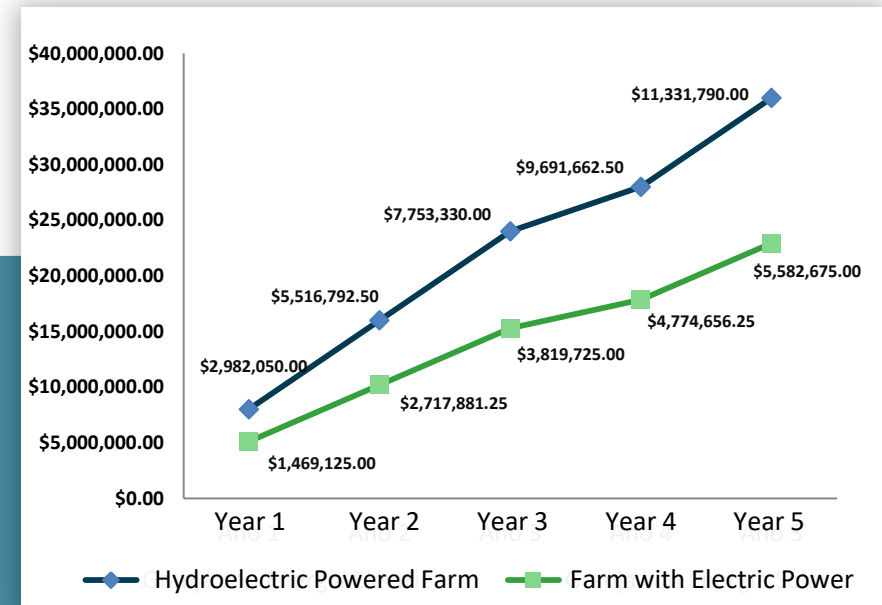

DIFFERENTIATION

Key Advantages

FEATURE	HydroMining	AVERAGE TOKEN
	✓	
UTILITY	Fund real farms	No real product
	✓	
TEAM TOKENS	0%	20-40%
	✓	
BLOCKED LIQUIDITY	Permanent	6-12 months
	✓	
AUDITS	Twice (Certik + EtherAuthority.io)	None or simple

COMPARISON TOTAL EARNINGS
1 FARM WITH 500 MINERS

BUSINESS MODEL

Profitable and Scalable

REVENUE STREAMS

TOKEN FEES

Annual with 10k daily users

\$9M

\$25M

MINING PROFITS

Per year with 10 farms

MARGINS

Expansion
and repair

20%

10% Team

70%
Token
BuyBack
and Burn

METRICS

Traction from Day 1

Year 1 Goal

CAC - LTV

THE TEAM

Proven Experience

VÍCTOR NIETO

9+ years of experience in
cryptocurrency mining

ADVISORS

- Blockchain Developers.
- Electrical Engineers.
- CertiK Auditors.
- Legal Advisors.

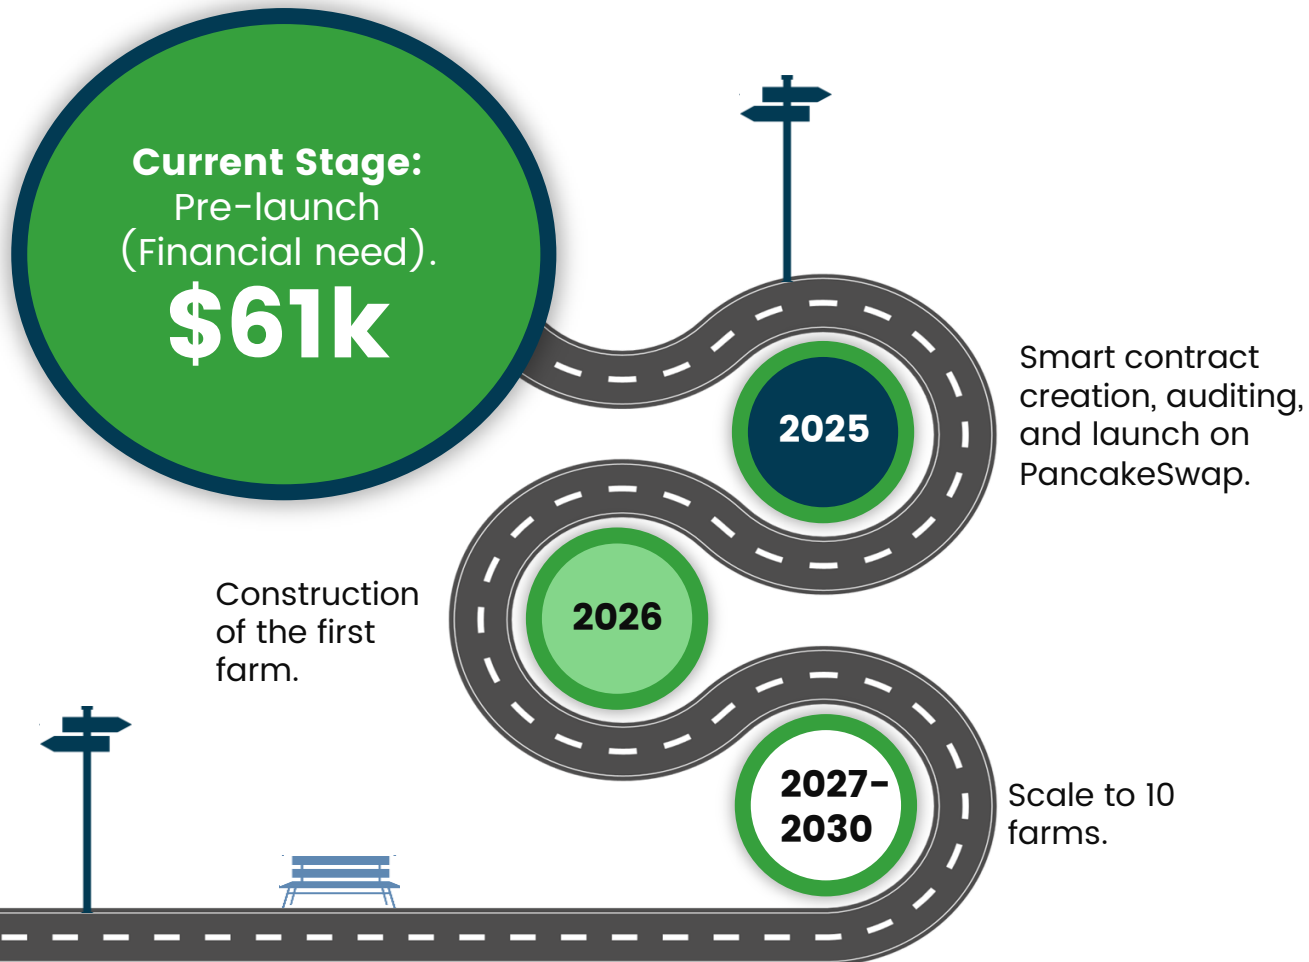

WITHOUT ANONYMITY

- Full KYC for trust.

ROADMAP

Financial Need

Fund Breakdown

Smart Contract Creation + Initial Audit	\$5,000
Certik Audit	\$30,000
Server and Website	\$500
For initial advertising	\$8,000
Initial Liquidity	\$11,000
Reserve fund	\$6,500

Offer: Initial investors receive 30% of team profits (projected: \$30M+ by 2030).

For \$61,000,
you secure stakes in
**10 profitable
hydroelectric farms**
and position HydroMining as
the green standard for
crypto. Let's prove that
blockchain can be both
ethical and profitable.

Mining's new current: Powered by waterfalls.

Thank you!
